🕒 **Z100F FLOFORCE™**

There Is No Equal

Z100F FloForce High Performance Roof Drain was designed to promote flow efficiency. The efficiency of this new drain is realized through a redesigned system, which optimizes the flow, at lower head depths.

To develop FloForce, we stepped back to the very beginning. Our engineers collaborated with industry partners, calculated possible enhancements, prototyped model after model, and tested and validated each iteration in our US-based facility.

The FloForce parabolical design and enhancements are engineered to flow at a lower head depth. The new drain was designed with the engineer, contractor, building owner, and roofer in mind. Beyond quick and effective evacuation, the unique dome and gravel guard limit debris and roof damage.

Reach your roof's flow potential, from install through torrential rainfall.

Reach Your Roof's Flow Potential

Up to Code

With emerging codes, engineers require real data for every roof drain. So, we determined the ideal specs and demonstrated the data for our go-to-market model.

- Over 2 years of prototypes paved the way to our FloForce today.
- Authentic flow data allows engineers to meet IPC code requirements during specification.
- Flow Curves provide the data Engineers need to calculate roof specification.
- Testing process adheres with ASME A112.6.4 testing criteria.

Easy Install

We solved for our contractor customers too. The labor-saving design eliminates pains and costs during installation.

- Optimized storm evacuation that may result in fewer systems required on each roof.
- Membrane-cut ridge and site holes ensures proper installation without hindering future performance.
- No sharp corners reduce risk of injury on the job.
- One-person installation saving time and money on the jobsite.

Superior Performance

A lot happens on a roof that we don't see. Debris, standing water, unpredictable weather—FloForce keeps up by design, so building owners can have peace of mind.

- Parabolic design creates laminar flow and evacuates water off the roof at lower head depths to create safer environment.
- Improved flow performance provides a more efficient system
- Unique dome and gravel guard design increase open area to maximize water drainage while limiting debris.
- Lean body and ladder pattern inhibit obstructions to slow things down.

- Partially recessed installation depth
- Sculpted waterfall shape
- Bosses moved outside of flow path
- Added circular-cut edge

- Teardrop-shaped gravel guard
- Smooth V-notch openings more than tripled the quantity of openings compared to a traditional design

- Staggered horizontal ribs which reduce isolated flow restrictions
- Greater open area per inch of dome height

FloForce sets the new standard in roof drainage. Visit zurn.com/floforce, and never drain the same.

Z130S AND Z131S SIPHONIC ROOF DRAINS

Z130S

Z131S

Custom Engineered To Meet the Needs of Your Building

Let Zurn® help you design the ideal siphonic drain system for your facility. Our systems result in more usable building space due to no-slope, horizontal piping that takes up less space running below the roof as compared to a gravity roof drain system. And our siphonic drains also utilize smaller pipe diameters which translates to lower building costs.

Reduced Building Cost

System uses smaller pipe diameters between 3"-6" versus traditional-sized pipes of 8"-12" used in other designs.

Quiet Operation

Near silent operation when siphonic roof drain is under full bore flow condition.

Quicker Installation

Integrated deck plate cuts roof drain installation time in half, compared to traditional installation methods.

Less Maintenance

Higher flow velocities make the system self-cleaning so there's no need for additional cleanouts.

Flexible Installation

System design allows for flexible vertical stack placement based on individual architectural needs.

Earn LEED Credits

Unique design can help earn credits for materials, innovation, sustainable sites, water efficiency, regional priority and atmosphere.

Contact your Zurn Elkay Sales Representative today to learn more.

PRODUCT HIGHLIGHT

⌚ EZ1™ TECHNOLOGY

LONG-TERM DURABILITY

Whether cast iron or plastic, EZ1 is crafted to stand up against wear and tear over the product's lifecycle.

A SPEEDY SETUP

Sold complete and ready to install, EZ1 is an intuitive product that saves contractors time and money.

DESIGNED TO RUN LIKE CLOCKWORK

EZ1's integrated engineering, which includes an easy post-pour adjustment and tilt accessory package, delivers high-level functionality and requires minimal skill to install or maintain.

⌚ SAVE OVER 14 MINUTES PER DRAIN INSTALL

Introducing the EZ1™, It's About Time

Contractors have waited long enough for a floor drain that's easy to install and built for the long haul. Zurn's EZ1—available in cast iron and plastic—comes out of the box as a complete system, allows for post-pour adjustment with an integrated strainer, provides job-site flexibility and maintains ongoing reliability.

Don't hesitate. Make the EZ choice. *Learn more at zurn.com/ez1*

Z1231EZ UNIVERSAL LAVATORY CARRIER

Leave Your Carrier Code Book Behind

Z1231EZ-15-UN-42

Whether you're a prefab contractor or the project engineer, our EZ Lavatory Carrier easily adapts to any application on the jobsite. The carrier features universal arms, an independent horizontal and vertical bracket system, and only two anchors per upright foot. You'll save steps without sacrificing strength behind the wall or compliance down the line.

Meet All Project Requirements

No more paging through codes for compatibility or upfront staging. The carrier's universal arms allow contractors to adjust height in the field and assemble with virtually any sink application.

Set Up Horizontally or Vertically

This is the only carrier on the market with an independent bracket system you can position horizontally or vertically. The intuitive, flexible connection system works with the site's configuration—not the other way around.

Save Steps with Less Foot Anchors

Cut your install time and costs in half. Instead of four foot anchors, this carrier secures in place with two. The anchors support up to 250 lbs, while limiting floor penetrations and eliminating the need for relegging.

Take the labor out of your next lavatory installation. Specify your next project at inspec.zurn.com.

🕒 **ZURN TOP-SET® DECK PLATE**

The -DP Option Is Top of Class,
With a Proven Feature Set That
Will Save Time and Money

Labor Saving

- -DP option features ease of installation for quick job completion
- Entire roof drain assembly installed from topside of roof requiring only pipe connection installation underside roof
- Deck plate replaces the need for separate under deck clamps and roof-sump receivers
- Pipe connection is completed

Versatility

- Three size (-DP) for trouble-free fit 8", 12", and 15" diameter drains
- Multiple slot arrangements to accommodate a variety of roof decks
- Constructed of 14-gauge steel with a corrosive-resistant finish

See (-DP) in the roof drain section for ordering information.

GREEN ROOFING DRAINAGE SOLUTIONS

It's Easy Being Green

Having proper drainage on a green roof is a critical aspect of the system. If the system is not able to drain properly, it can negatively impact the vegetation due to over-saturation of the soil. As the soil takes on excessive amounts of water, it continues to add weight to the roofing structure. This added load has the potential to compromise the structural integrity of the roof. In order to prevent these situations from occurring, the roof drain must allow adequate flow through the drain at all times.

Performance

Stainless steel perforated extension allows for optimal flow into the roof drain while simultaneously keeping debris out.

Ease of Maintenance

Removable lid allows for easy routine maintenance.

Versatility

Customizable enclosures guarantee the roof drain aligns with the green roof surface and offer an aesthetically appealing finish to the roof environment.

Flexibility

Simplify the installation process by customizing the order to ship the perforated extension after the drain has been installed

Z110 Green Roof Drain with Enclosure Height for Intensive Green Roof Systems

See pages 27-29 for ordering information.

⌚ **Z1222-CB CARRIER BANK**

Designed To Speed Up Your Installation

Multiple station plate system provides an extended length plate fabricated with exact center-to-center locations to accommodate a bank of multiple urinals. Custom-length plates are specific to job requirements and are provided with loose uprights and boxed mounting hardware and studs. Ideally suited for prefabricated applications.

The following information is necessary when specifying the carrier bank:

- Fixture manufacturer, model number, and quantity of fixtures
- Center-to-center spacing of urinals
- Handicap fixture quantity and location (if applicable)
- Wall thickness

Note: Custom carrier banks are available for all Zurn plate type systems.

ROOF DRAIN - PRODUCT COMPLIANCE

Zurn roof drains are constructed of high quality materials and, in general, are designed to meet the requirements of ASME Standard A112.6.4 (revision and redesignation of ANSI A112.21.2M).

For verification of a selected roof drain, contact your local Zurn Sales Representative.

ROOF DRAIN - GENERAL INFORMATION

Zurn roof drains are comprised of three basic components: a body (sump), a combination membrane flashing clamp/gravel guard, and a dome strainer. Two of Zurn's roof drains are the Z100-DE and Z100-DR, shown below. These illustrate the basic components and options: the adjustable extension -DE (Deck Extension), -DR (Drain Riser), and Top-Set Roof Deck Plate (-DP).

Note: Neo-Loc outlets are not recommended for roof drain applications due to the watertight integrity of the Neo-Loc connection to the leader pipe being dependent upon adequate leader pipe support and accurate perpendicularity of leader pipe into Neo-Loc gasket.

ROOF DRAIN - APPLICATION INDEX

Roof drain selection should be made with a specific type of roof construction in mind. The many types and sizes of drains offered by Zurn, coupled with a wide array of available options, provide you with a roof drain for all applications.

APPLICATION	RECOMMENDED ROOF DRAIN
Main Roof	Z100F, Z100, Z100-90, Z104, Z105, Z107, Z108

Z100F FLOFORCE™ HIGH PERFORMANCE ROOF DRAIN - LOW SILHOUETTE DOME

ENGINEERING SPECIFICATION

FLOFORCE™ High efficient flow performing roof drain that is engineered to evacuate water off of roof structure by incorporating a smooth funnel shaped interior surface, providing a seamless transition to outlet connection and eliminating internal obstructions. Complete with Dura-Coated cast iron body with combination membrane flashing clamp/gravel guard and low silhouette Poly-Dome. Flashing clamp/gravel guard provided to prevent debris from entering the drain while allowing water to immediately pass through at zero head level. Poly-dome designed to maximize effective open area and promote efficient flow. (Refer to www.zurn.com for flow curves)

FLOOR DRAINS - GENERAL INFORMATION

Zurn floor drains are generally made up of a body, combination frame/clamp collar and top grate. The assemblies shown below illustrate the more common components utilized in floor drains.

Zurn floor drains are available in 2" through 10" outlet sizes (and 12" for specific drains and outlet type) with Inside Caulk, Threaded, No-Hub and Neo-Loc connections.

Z415 "Type B" Illustrated

Z541 Illustrated

FLOOR DRAINS - APPLICATION INDEX

The Zurn floor drains below are recommended for the applications listed. Most Zurn floor drains can be readily adapted for use in finished areas by using bronze or nickel bronze grates and strainers. (Use Prefix "ZB" or "ZN" preceding the product number in place of the usual "Z" Prefix.)

APPLICATION	RECOMMENDED FLOOR DRAIN
Automobile Parking Area	Z533, Z534, Z535, Z536, Z537, Z541, Z546, Z547, Z662, Z662-HF
Basement and Subterranean Areas	Z566, Z730
Boiler House and Maintenance Areas	Z541-90, Z546, Z645
Clinical, Surgical, Detention Areas	Z300, Z310, Z315, Z319, Z461
Entrances and Concourses	Z664, Z665, Z667
Finished Area/Gutter	Z460B, Z575
Finished Interior Floor Areas Adjustable	Z415-BZ1, Z415-SZ1, Z415-BZ1-DP, Z415-SZ1-DP, Z415B-DP, Z415S-DP, ZN415, ZS415, ZN450, Z451B, ZN453, ZN455, ZN456, Z460B, Z461
Finished Interior Floor Areas Adjustable with EZ1™ Technology (Post Pour Adjustment)	Z415-BZ1, Z415-SZ1, Z415-BZ1-DP, Z415-SZ1-DP
Food Preparation Areas	Z320, ZN610-SS (Also See Sani-Flor Receptors - Z1900 Series)
Garage, Hangar and Service Areas	Z546, Z664, Z665, Z667, Z673, Z675, Z676
Indirect Waste Area (Condensate and Drip)	Z325, Z326, Z328, Z329, Z566
Industrial Areas - Vertical Adjustment	Z520, Z521, Z526
Medium Duty	Z550, Z551, Z609, Z611, Z667, Z730
Heavy Duty	Z508, Z509, Z511, Z512, Z520, Z521, Z532, Z539, Z541, Z545, Z575
Extra Heavy Duty	Z546, Z503, Z512, Z541, Z610, Z645, Z662, Z664, Z668, Z673, Z675, Z676
Traps and Backwater Valves	Z730
Planting Area	Z349, Z350
Prison Cell (Multi-Purpose)	Z355
Roadways	Z546, Z610, Z668, Z673

*Regularly furnished unless otherwise specified.

Items designated as Best Sellers are most specified and are generally in stock for shipment.

SHIM KIT

Shims built into the rough-in cover for tilt adjustment, screws included.

ROUGH-IN COVER

Designed to stand up to rigorous jobsites with 3,000 lb load rating.

PROTECTIVE LABEL

Keeps grate/cover finish intact until the job is complete.

COVER OPTIONS

- BZ1** = Round with Post-Pour Adjustability
- SZ1** = Square with Post-Pour Adjustability
- ZN** = Polished Nickel Bronze Top
- ZB** = Polished Bronze Top
- ZS** = Polished Stainless Steel Top

BODY OPTIONS

- IC** = Inside Caulk
- IG** = Inside Gasket
- IP** = Threaded
- NH** = No-Hub
- NL** = Neo-Loc

OUTLET SIZES

Available in outlet sizes ranging from 2" through 6"

A Whole Family of Product

- BZ1** = Round cast iron floor drain or cleanout
- SZ1** = Square cast iron floor drain or cleanout
- DP** = Stainless steel deck plate for a cast iron floor drain or cleanout

Model Number Example

[ZN][415]-[3][NH]-[5][S][Z1]-[DP]
ZN = Denotes cover material
415 or 1400 = Denotes floor drain or cleanout
3 = Denotes outlet size
NH = Denotes outlet type

5, 6, or 8 = Denotes cover size
S = Denotes round or square
Z1 = Denotes post-pour adjustability
DP = Denotes deck plate

*Comes standard with nickel bronze unless otherwise noted.

-9		9 [229]	
-10		10 [254]	

PREFIXES	DESCRIPTION	PRODUCT DESIGNATION	LIST PRICE
Z499S*	Floor Drain Protective Cover	-5, -6, -7, -8, -10	96.00

🕒 Z415-BZ1 BODY ASSEMBLY W/ "TYPE B" STRAINER AND EZ1™ TECHNOLOGY

ENGINEERING SPECIFICATION

Zurn Z415-BZ1 floor and shower drain features Dura-coated cast iron body with bottom outlet, combination invertible membrane clamp and adjustable collar with seepage slots, and top assembly. EZ1 drainage series is engineered to simplify product installation, comprised of concrete shield, up to 1" [25] of vertical post pour adjustment, pre-packaged shims for tilt correction and integrated self-contained "Type B" light duty strainer with rough-in cover for protection during concrete pour.

Z456 DEEP SEAL TRAP DRAIN WITH FLOOR CLEANOUT AND CLAMP COLLAR WITH "TYPE B" STRAINER

ENGINEERING SPECIFICATION

Zurn ZN456B floor and shower drain features Dura-Coated cast iron body, deep seal integral trap with clamp collar, seepage pan, floor level cleanout, and adjustable "Type B" polished, nickel bronze strainer.

NOTES

For other available strainer variations, see our Z400 Strainer Series. Add price for required strainer to "BODY ONLY" price in chart. Specify strainer designation required.

Z1072 ZSHIELD™ BARRIER TRAP SEAL DEVICE FOR FLOOR DRAINS

ENGINEERING SPECIFICATION

Zurn Z1072 ZShield Barrier trap seal device for use with floor drains to minimize trap evaporation. Product is comprised of an ABS rigid structure, silicone gasket and seal for 2", 3", 3-1/2", and 4" sizes. Device is engineered to comply with the performance requirements of ASSE 1072 standard and is third party listed with IAPMO (UPC), ICC (ICC cES PMG) and ASSE.

Z1020XL ELECTRONIC TRAP PRIMER

ENGINEERING SPECIFICATION

Zurn Z1020XL factory programmed, 5-port, lead-free electronic trap primer provides a six second water injection to traps every twenty-four hours.[†] Trap primer features a galvanized steel combination surface or recessed housing and cover, 1/2" solder copper inlet connection, brass ball-type stop valve, slow-closing 24 VAC solenoid valve with integral strainer, 120-24 VAC transformer, brass atmospheric vacuum breaker, PEX waterway, and anti-scaling multi-port manifold with five 1/2" male PEX outlet connections.

Min. Pressure: 3 psi
 Working Pressure: 20 to 100 psig
 Default Settings:
 -Frequency: 24 hours
 -Injection Time: 6 seconds
 -Volume: 2 oz. min. per port

NOTE

[†]Regularly furnished unless otherwise specified. Alternative flow settings are available upon request.

Zurn Z1090 backwater valve features Dura-Coated cast iron body, no-hub inlet and outlet, gasketed bolted cover, and automatic PVC (3" and 4" sizes only) flapper type backwater valve with O-ring.

NOTE

Inlet sizes up to 4"[102] utilize a flapper that hangs normally closed. Sizes greater than 4"[102] and BV option utilize a bronze flapper that hangs 1/4"[6] normally open."

INTERCEPTORS – GENERAL INFORMATION

Zurn manufactures three types of interceptors to meet all your plumbing needs: grease interceptors, solids interceptors, and oil interceptors. Zurn interceptors are designed for use in plumbing wastewater systems to prevent harmful or undesirable substances from entering the wastewater control system. Note: Interceptors are not pressurized vessels and should not undergo pressure testing.

To obtain more detailed information on Zurn interceptors, phone 855-ONE-ZURN, or contact your local Zurn sales representative.

INTERCEPTORS – APPLICATION INDEX

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION

RECOMMENDED INTERCEPTOR

*A Zurn Solids Interceptor is recommended to be used in conjunction with all grease interceptors. See product information for details.

GREASE INTERCEPTORS – PURPOSE

For over a hundred years, grease interceptors have been used in plumbing wastewater systems to permit free flow of drainage from sinks and similar equipment. They have played an important role in preventing grease accumulations from clogging waste pipes and sewer lines. They also help to improve operations at wastewater treatment facilities and prevent environmental problems caused by grease.

Zurn engineers were part of the original team that developed the current Plumbing and Drainage Institute Standard PDI-G101, which was first issued in 1949. PDI-G101 is now cited in numerous codes, as well as in Military Specification MIL-T-18361. Many Zurn grease interceptors comply with PDI-G101 and carry the PDI label.

WHY ARE GREASE INTERCEPTORS NEEDED?

1. To prevent waste pipes in buildings from becoming clogged.
2. To prevent sewer lines from clogging and improve operation of water treatment plants by reducing the wastewater grease load from entering the plant.
3. To prevent environmental problems caused by grease mixed with other debris at landfills and in waterways.
4. To promote the recycling of recovered clean grease.

Grease entering the wastewater collection system presents major problems from the moment of entry and continuing to the final stage in wastewater treatment. It is an expensive burden in sewer pipes due to blockage and reduced capacity, causing the need for frequent cleaning. In severe cases, entire lengths of sewer pipe must be replaced due to solidification of the grease and other debris. Grease also causes substantial problems in wastewater treatment facilities because of its detrimental effect on the bacterial process of wastewater treatment. Not only is there a grease removal problem, but large quantities of grease can overload and compromise the digestive process, adversely affecting the operation of the wastewater treatment plant.

Another important reason for grease interception and recovery is for recycling. Grease, if recovered and purified (free of contaminants and water) can be turned into a valuable resource. Recovered grease can be used in the manufacturing of fertilizers, soaps, animal feed, cosmetics, and components of explosives such as nitroglycerine.

GREASE INTERCEPTORS – OPERATION

Four factors are critical to the proper operation of a grease interceptor: design, sizing, proper installation, and maintenance.

DESIGN

What makes Zurn interceptors most efficient are superior design characteristics (Diagram A).

Standard Zurn units are provided with a high inlet which allows all flow to empty into the interceptor. This keeps inlet lines from becoming clogged with grease buildup, which occurs with low inlet units and with large concrete separators buried outside. Because the static water level is maintained at the bottom of the outlet, any piping into the interceptor below this elevation will remain filled with water.

The Zurn solid vertical baffle plate immediately diffuses flow and channels the incoming fluids directly to the bottom of the separation chamber. A flow directing plate on the outlet side of the vertical baffle enhances flow in an upward direction and traps solids that may inadvertently enter the interceptor. This provides the maximum amount of time possible for separation to occur. Grease being approximately 90% of the weight of water, separates and floats to the top of the water under these conditions. The calming effect on the flow and the extended time sequence in the chamber allows for more efficient separation (Diagram A).

Zurn interceptors have an unobstructed separation chamber permitting the entire baffle to be lifted upward and removed. This provides for fast, easy cleaning which minimizes the amount of time the lid is off and the contents are exposed to the environment.

Odor from accumulated grease in an interceptor may pass back through the piping system and through the drain opening. An additional trap should be considered between the fixture and interceptor. Consult local codes.

Zurn interceptors are manufactured standard with a removable cleanout plug on the outlet side of the separation chamber, past the integral trap seal. This allows for quick, easy access to the outlet drainage pipe, should an obstruction or blockage occur downstream of the interceptor.

Zurn 1100 Series Interceptors are 100% steel construction, coated with a white acid-resisting epoxy (A.R.C.). Zurn Series Interceptors with flow rates from 4 to 50 GPM are certified by the Plumbing and Drainage Institute (PDI). Zurn Grease Interceptors with flow rates from 20 to 50 GPM are listed by the International Association of Plumbing and Mechanical Officials (IAPMO).

SIZING

The Plumbing and Drainage Institute (PDI) as well as some national and local codes have recognized different ways of sizing grease interceptors. It is advisable to check with local authorities for sizing requirements in your particular locality.

The following pages outline the most widely used sizing methods along with some common variables which, if present, could adversely affect the operation of your grease interceptor. If any of the following variables are present, added care should be taken to select the proper size interceptor with appropriate options to compensate for each irregularity.

VARIABLES AFFECTING GREASE INTERCEPTOR PERFORMANCE

VELOCITY OF INCOMING WATER

A higher velocity of water will contribute to a more turbulent mixture. This will slow the grease separation process, thereby reducing efficiency.

Recommended Solution – Maximize incoming pipe size to lower flow velocity or install additional flow control fittings at all sources of flow.

RATIO OF GREASE TO THE WATER

The higher the ratio of grease particles to the water, the lower the efficiency of the interceptor.

Recommended Solution – Increase the size of the interceptor.

SPECIFIC GRAVITY (WEIGHT) OF THE FILTRATES

Grease has a lower specific gravity than water and will rise to the surface quickly. Grease-laden food particles, having a higher specific gravity than water, will linger and accumulate at the bottom, eventually passing out of the interceptor.

Recommended Solution – Install a solids interceptor at the source of solid particles, prior to the grease interceptor.

POSSIBLE PRESENCE OF DETERGENTS IN THE SYSTEM

Grease-cutting detergents will break the liquid grease into minute particles that can cause these liquids to pass through the interceptor.

Recommended Solution – Minimize the use of detergents, or increase the size of the interceptor.

PERCENTAGE OF MAXIMUM FLOW CAPACITY

If the maximum recommended flow is exceeded, the efficiency of the interceptor will decrease considerably.

Recommended Solution – Increase size of the interceptor to accommodate the increased flow, or install additional flow control fittings at all sources of flow.

LOCATION OF GREASE INTERCEPTOR

The interceptor should be located as close as possible to the source of grease. Waste pipes leading to the grease interceptor may become clogged if liquid cools prior to entering the grease interceptor.

*Regularly furnished unless otherwise specified.

Items designated as Best Sellers are most specified and are generally in stock for shipment.

Z250H FOG-CEPTOR® INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z250H FOG-ceptor is engineered fiberglass, fats, oil, and grease interceptor, and dual manway interceptor with external flow control device. PDI and IAPMO rated at 100 gpm and 200 lb. Regularly furnished with 4" Schedule 40 PVC inlet and outlet. Includes two 20" diameter H-20 rated fiberglass bolted and gasketed frames and covers, four tubes of Sikaflex® bonding agent, one external flow control device, and two 3' high x 20" diameter extension collars.

NOTES

Location of outlet from bottom of interceptor cannot be changed.

Z1165 100 PPM GREASE INTERCEPTOR SYSTEM WITH SOLIDS INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1165 grease interceptor system features acid resistant coated interior and fabricated steel exterior, PDI rated at ___ gpm and ___ lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover completes tie down assembly with Z1108 flow control fitting. Includes acid resistant coated fabricated steel solids interceptor with replaceable filter bags, retainer plate, latched lid, and removable sediment basket. Grease interceptor effluent efficiency meets 100 parts per million when tested to EPA 1664 test method. Results based on the influent requirements in accordance with the maximum rated capacity given by Plumbing and Drainage Institute Standard PDI-G101. The presence of solids particles may cause results to vary per application.

NOTES

Location of inlet and outlet from bottom of interceptor cannot be changed. For the Z1165 size 700, the Miami-Dade DERM label is located under the cover of the grease interceptor and solid interceptor.

Z1170 GREASE INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1170 grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at ___ gpm and ___ lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover comes complete with center tie down assembly with Z1108 flow control fitting. Regularly furnished with a high inlet and outlet connection.

NOTES

Location of outlet from bottom of interceptor cannot be changed.

Z1170-UN GREASE INTERCEPTOR WITH USER NOTIFICATION SYSTEM

ENGINEERING SPECIFICATION

Zurn Z1170-UN grease interceptor features acid resistant coated interior and fabricated steel exterior, rated at ___ gpm and ___ lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Includes encased fiberglass sensor box containing an electronic grease level sensor and a fiberglass display box with green power light, red grease level light, audio alarm, and junction box. Regularly furnished with a high inlet and outlet connection.

NOTES

1. Location of outlet from bottom of interceptor cannot be changed.
2. Factory installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
3. Power supply 120V GFCI.

RECOMMENDED INSTALLATIONS

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)

ZS1170 GREASE INTERCEPTOR STAINLESS STEEL

ENGINEERING SPECIFICATION

Zurn ZS1170 all type 304 grease interceptor features fabricated stainless steel, PDI rated at ___ gpm and ___ lb grease capacity, internal air relief bypass, bronze, and visible double wall trap seal with removable combination pressure equalizing/flow-diffusing baffle and sediment tray. Gasketed, non-skid, secured cover comes complete with Z1108 flow control fitting. Regularly furnished inlet and outlet in high position.

NOTES

Location of outlet from bottom of interceptor cannot be changed.

Z1171 LOW PROFILE GREASE INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1171 low profile grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at ___gpm and ___lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Regularly furnished with 3" low inlet and outlet.*

CAUTION

Solids should not be permitted to enter a grease interceptor. Where solids are present, use a Zurn Z1183 or Z1183-DF solids interceptor (see pages 183 and 184). Installations using indirect piping to unit could result in standing water in floor sink or flooding if line blockage occurs. Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1171-TD LOW PROFILE GREASE INTERCEPTOR WITH ACCUMULATING CONE AND FLOW CONTROL TEE

ENGINEERING SPECIFICATION

Zurn Z1171-TD low profile grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at ___gpm and ___lb grease capacity, internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable combination pressure equalizing/flow-diffusing baffle and sediment tray. Gasketed, non-skid, secured cover comes complete with draw-off port having bronze plug, grease accumulating cone, NPT to hose adapter, 2-foot flexible hose, hose clamp, and in-line closure valve, complete with Z1108 flow control fitting. Regularly furnished with 3" low inlet and outlet.

CAUTION

Solids should not be permitted to enter a grease interceptor. Where solids are present, use a Zurn Z1183 or Z1183-DF solids interceptor (see pages 183 and 184). Installations using indirect piping to unit could result in standing water in floor sink or flooding if line blockage occurs. Z1172-UN LARGE CAPACITY GREASE INTERCEPTOR WITH USER NOTIFICATION SYSTEM

ENGINEERING SPECIFICATION

Zurn Z1172-UN Large capacity, Acid Resistant Coated interior and exterior fabricated steel grease interceptor, rated at ___gpm and ___lbs. grease capacity, with internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable pressure equalizing/flow-diffusing baffle. Gasketed, non-skid, secured cover with removable lift handles complete with flow control fitting. Includes encased fiberglass sensor box containing an electronic grease level sensor (specify right or left side[†]), a fiberglass display box with one green power light, red grease level light, audio alarm, and junction box. Regularly furnished with inlet and outlet in high position.

NOTES

1. Location of inlet/outlet from bottom of interceptor cannot be changed. Power supply 120V GFCI.
2. [†]Sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
3. Sizes 900 and 1000 require one cover.
4. Sizes 1100 and 1600 require two covers.
5. Sizes 1700 thru 1900 require three covers.

RECOMMENDED INSTALLATIONS

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)

Z1173 EJECTO-MATIC GREASE INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1173 ejecto-matic grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at ___gpm and ___lb grease capacity, internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable combination pressure equalizing/flow-diffusing baffle and sediment tray and grease retention tray adjacent to grease draw-off valve. Gasketed, non-skid, secured cover comes complete with Z1108 flow control fitting. Regularly furnished with high inlet and outlet connection.

NOTES

1. Location of outlet from bottom of interceptor cannot be changed. Draw-off connection regularly furnished on outlet side.
2. On sizes #200 and #300, the grease draw-off valve is located on the left-hand side of the trap when facing the inlet, instead of on the outlet side as shown.

CAUTION

Solids should not be permitted to enter a grease interceptor.

Where solids are present, use a Zurn Z1183 or Z1183-DF solids interceptor (see pages 183 and 184).

Installations using indirect piping to unit could result in standing water in floor sink or flooding if line blockage occurs.

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1174 GREASE EATING BACTERIA DOSING UNIT AND SOLIDS INTERCEPTOR COMBINATION

ZS1174 Shown. Z is Standard.

ENGINEERING SPECIFICATION

Zurn Z1174 grease interceptor with automatic bacteria dosing unit features acid resistant coated interior and exterior fabricated steel exterior, rated at _____ gpm and _____ lb grease capacity, internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable pressure equalizing/flow-diffusing inlet baffle and fixed bottom outlet baffle. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Furnished with Z1183 ARC solids interceptor, 110 VAC pump, pump mounting hardware, 15 feet of poly tubing and 5 gallons of grease-eating bacteria. Regularly furnished with inlet and outlet in high position.

NOTES

Location of outlet from bottom for interceptor cannot be changed.

SOLIDS INTERCEPTORS – GENERAL PRODUCT INFORMATION

Zurn solids interceptors are specifically designed to capture and retain solid particles for a variety of different drain line applications. Units are available in Dura-Coated cast iron, bronze, Acid Resistant Coated steel and stainless steel, along with a multitude of screens designed for each application. If you require a solids interceptor not listed, phone 855-ONE-ZURN, or contact your local Zurn sales representative. Special screens and sizes are available to meet almost any need.

SOLIDS INTERCEPTORS – APPLICATION INDEX

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION	RECOMMENDED INTERCEPTOR
Food Preparation	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC
Hair Salons	Z1175, Z1176, Z1180, Z1184
Plaster	Z1180, Z1181
Barium	Z1180
Fish Scales	Z1181, Z1183, Z1183-FC, Z1185
Garbage Disposal	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC
Laundry, Clothes Washers	Z1185
With Z1170 and Z1173 Interceptors	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC

SOLIDS INTERCEPTORS – SIZING

All Zurn solids interceptors are designed for gravity flow where minimal head is expected. Zurn solids interceptors are designed to accommodate the flow rate of their inlet and outlet pipe size, provided they are maintained and kept clean.

Zurn solids interceptors should be sized by both expected flow rate and holding capacity. Z1185 lint interceptors must, however, be sized for the number of washing machines which they serve. Sizing for the Z1181 solids interceptor should be sized by the number and size of the sinks being served as is the case with the Z1170 grease interceptor.

Fixture Compartment Size (Inches)	Number of Compartments	Drainage Load (Gallons)	Recommended Size Solids interceptors	
			One-minute Drainage Period	Two-minute Drainage Period
18 x 12 x 6	1	4.2	7	4
16 x 14 x 8	1	5.8	7	4
20 x 18 x 8	1	9.4	10	7
18 x 16 x 8	2	15.0	15	10
20 x 18 x 8	2	18.7	20	10
30 x 20 x 8	1	15.5	20	10
24 x 20 x 12	1	18.7	20	10
22 x 20 x 8	2	23.0	25	15
22 x 20 x 12	2	34.0	35	20
24 x 24 x 12	2	44.9	50	25

Z1175 HAIR INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1175 Dura-Coated cast iron hair and solids interceptor, in lieu of fixture "P" trap, with 1-1/2" slip joint elbow inlet and 1-1/2" threaded side outlet, perforated stainless steel basket, removable from bottom, with flanged and gasketed, slotted cleanout cover with raised head. Perforation size is 1/8".

Z1180 SOLIDS INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1180 solids interceptor works in lieu of fixture "P" trap. Features acid resistant composite, on-floor installation, removable PVC sediment bucket with a removable 3/32" diameter perforated flow defusing/intercepting PVC screen, top access, gasketed, secured cover, stainless steel draw latches and hardware with an ABS handle for easy removal of sediment bucket and screen.

NOTES

*Regularly furnished with 2" threaded low inlet and high outlet.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1181 SOLIDS INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1181 solids interceptor features large capacity, acid resistant coated interior and fabricated steel exterior. Works in lieu of fixture "P" trap for on-floor or flush with floor installation. Furnished with a removable, acid resistant coated fabricated steel bucket with removable primary (3/8" diameter holes) and secondary (3/32" diameter holes) flow diffusing/intercepting brass screens, and complete with a top access, gasketed, secured cover.

NOTES

*Regularly furnished with 2" threaded low inlet and high outlet.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1182 SIDE ACCESS SOLIDS INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1182 side access solids interceptor features stainless steel construction. Ideal for suspended or under sink installations where there are height restrictions for a top removal solids interceptor. Furnished with removable sediment basket attached to a removable, gasketed, latched lid. All units have a high inlet and a low outlet on each side for right- or left-hand mounting.

Z1183-DF SOLIDS INTERCEPTOR WITH DISPOSABLE FILTER BAGS

ENGINEERING SPECIFICATION

Zurn Z1183-DF solids interceptor features acid resistant coated fabricated steel or stainless steel. Ideal for on floor or semi-recessed installation with replaceable filter bags, retainer plate, latched lid, and removable sediment basket. Size to be used with corresponding Z1170 grease interceptor.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1184 BOTTOM ACCESS SOLIDS INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1184 bottom access solids interceptor features acid resistant composite. Works in lieu of fixture "P" trap for suspended installation. Includes removable PVC sediment bucket with a removable 3/32" diameter perforated flow defusing/intercepting PVC screen, designed to intercept all types of solids and precious metals. Bottom access gasketed, secured cover comes complete with stainless steel draw latches and hardware with an ABS combination handle and drain port plug for easy removal of sediment bucket and screen.

NOTES

†Regularly furnished with 2" threaded low inlet and high outlet.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

OIL INTERCEPTORS – GENERAL PRODUCT INFORMATION

Zurn oil interceptors are designed to be similar to the grease interceptors. Both work on the principle that oils are lighter than water and thus gravity causes the oil to rise and the solids to fall. Zurn oil interceptors come equipped with a removable sediment bucket on the inlet to trap stones, grit and other substances. Their perforated, flow-diffusing baffle eliminates turbulence and allows for high efficiency of separation.

All Zurn Z1186 and Z1188 oil interceptors are supplied with a specific gravity oil draw-off tube assembly. This assembly is to be set 1/8 above the static water level, per standard installation instructions. Once oil builds down to this level, the oil draws off by gravity through the tube assembly.

All Zurn oil interceptors are of 100% steel construction coated with a blue acid resisting epoxy. All Zurn oil interceptors are listed by the IAPMO. If you require an oil interceptor not listed phone 855-ONE-ZURN, or contact your local Zurn sales representative.

OIL INTERCEPTORS – APPLICATION INDEX

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION

RECOMMENDED INTERCEPTOR

Maintenance, Parking Garage, Oil Spill Areas	Z1186, Z1186-ST, Z1187, Z1187-SI, Z1188, Z1188-ST, Z1189, Z1196, Z1198, Z1198-ST
Municipal Water Systems, Wells	Z1187
Electronic Oil Level Sensors	Z1194, Z1196, Z1198, Z1198-ST

Z1186 OIL INTERCEPTOR

ENGINEERING SPECIFICATION

Zurn Z1186 oil interceptor features acid resistant coated interior and fabricated steel exterior, bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, adjustable oil draw-off, and vent connections (either side). Gasketed, non-skid, secured cover comes complete with flow control fitting. Regularly furnished with inlet and outlet in high position.

NOTES

Location of outlet from bottom of interceptor cannot be changed.

*Inlet and outlet sizes shown indicate standard operating sizes and flow control settings. Size #300 and #400 will have 3" connections reduced to 2" as standard. Size #700 and #800 will have 4" connections reduced to 3" as standard.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1186-ST OIL INTERCEPTOR WITH INTEGRAL STORAGE TANK

ENGINEERING SPECIFICATION

Zurn Z1186-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, oil draw-off, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left-hand integral storage tank. Regularly furnished with inlet and outlet in high position.

NOTES

Location of outlet from bottom of interceptor cannot be changed. Regularly furnished with left-hand side storage tank.

*Inlet and outlet sizes shown indicate standard operating sizes and flow control settings. Size #300 and #400 will have 3" connections reduced to 2" as standard. Size #700 and #800 will have 4" connections reduced to 3" as standard.

Z1188-ST LARGE CAPACITY OIL INTERCEPTOR WITH INTEGRAL STORAGE TANK

ENGINEERING SPECIFICATION

Zurn Z1188-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, adjustable oil draw-off, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left-hand integral storage tank. Regularly furnished with inlet and outlet in high position.

NOTES

Location of outlet from bottom of interceptor cannot be changed.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1194 OIL LEVEL SENSOR RETROFIT KIT

ENGINEERING SPECIFICATION

Zurn Z1194 oil level sensor retrofit kit features a fiberglass sensor box containing an electronic oil level sensor and a fiberglass display box with one green power light, red oil level light, audible alarm, and junction box. Intended use for retrofit applications on Z1186 and Z1188 oil interceptors. Power supply 100 to 240 VAC at 47 to 63 Hz, GFCI.

CAUTION

Caution: Interceptor must be cleaned of solids and other debris and the sensors wiped off on a regular basis in order to ensure proper operation of the system. Z1194 TO BE USED WITH INTERCEPTORS FOR ON-THE-FLOOR INSTALLATION ONLY.

Z1196 OIL INTERCEPTOR WITH OIL LEVEL SENSOR

ENGINEERING SPECIFICATION

Zurn Z1196 oil interceptor features acid resistant coated interior and fabricated steel exterior with a fiberglass sensor box containing an electronic oil level sensor (specify right or left side[†]) and a fiberglass display box with one green power light, red oil level light, audible alarm and junction box. Includes bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, and vent connections either side. Secured, gasketed, non-skid cover comes complete with flow control fitting. Regularly furnished with inlet and outlet in high position.

NOTES

- [†]Installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
- [‡]Inlet and outlet sizes shown indicate standard operating sizes and flow control settings. Size #300 and #400 will have 3" connections reduced to 2" as standard. Size #700 and #800 will have 4" connections reduced to 3" as standard. If changed, flow control must be adjusted accordingly.
- Power supply 120V GFCI.
- Recommended Installations: Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)
- For pit installation, see Form No. IT66.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

NOTES

- [†]Installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
- Power supply 120V GFCI.

RECOMMENDED INSTALLATIONS

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.) For pit installation, see Form No. IT62.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z1198-ST LARGE CAPACITY OIL INTERCEPTOR WITH INTEGRAL STORAGE TANK AND OIL LEVEL FLOAT SENSOR

ENGINEERING SPECIFICATION

Zurn Z1198-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, fiberglass sensor box containing an electronic oil level sensor, fiberglass display box with audio and visual alarms and junction box. Includes bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, adjustable oil draw-off, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left hand integral storage tank. Regularly furnished with inlet and outlet in high position.

NOTES

Location of inlet and outlet from bottom of interceptor cannot be changed.

CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Z9A-PHIX UNDER SINK ACID NEUTRALIZATION CARTRIDGE SYSTEM

ENGINEERING SPECIFICATION

Point of use application, replacing standard P-trap. Includes industrial strength glass-filled polypropylene body with a 1-1/2" [38mm] compression fitting inlet and 1-1/2" [38mm] no-hub outlet, removable upper neutralization chamber, and lower sediment collection chamber.

MODEL NO.	INLET	OUTLET	LIST PRICE
Z9A-PHIX	1-1/2"	1-1/2"	3,397.00

The PHIX Cartridge System includes the cartridge, brass nut and compression ring, siphon, hose, support bracket, drainage pail, two bags of PHIX Media and a 10 year warranty.

Z9-PHIX-MEDIA PHIX MEDIA 5 GALLON PAIL

ENGINEERING SPECIFICATION

PHIX Media is a non-hazardous, non-WHIMIS material used to neutralize acid in the PHIX cartridge and can be used to replace limestone in existing neutralization tanks. PHIX Media is a safe alternative to limestone and does not require special handling or storage.

CARRIER - PRODUCT COMPLIANCE

Zurn systems comply with ANSI A112.6.1M and are listed with IAPMO. For verification of a selected carrier, contact your local Zurn Sales Representative.

CARRIER - HOW TO SPECIFY

CARRIER - TECHNICAL DATA

DETERMINATION OF RIGHT- AND LEFT-HAND SYSTEMS

Stand facing the fixture.

If flow is from the right, Zurn System is right-hand. If flow is from the left, Zurn System is left-hand.

CARRIER – TECHNICAL DATA

DETERMINATION OF COUPLING AND FIXTURE DISTANCES FROM FRONT OF WALL

To ensure a tight seal at outlet of closet having a rectangular groove, the front end of the coupling should be located to compress the gasket adequately when the fixture is in the desired location. This dimension will vary depending on depth of recess (Dim. A) in closet. The following formula may be used to determine amount coupling should extend (Dim. B) in front of finished wall.

Inset illustrates depth of gasket recess in fixture and coupling with normal pressure on gasket.

A = depth of recess in closet

X = distance closet is to be located from finished wall

B = distance coupling should extend in front of finished wall.

$$\text{Thus, } A + X - 1/2" = B$$

With fixtures having vee-shaped grooves, coupling may have to extend an additional 1/8" or more. With any closet, the coupling must compress the gasket enough so that the adhesive-coated surfaces are in good contact with the china and the face of the coupling.

IMPORTANT: Bearing nuts and washers must be located properly to establish and maintain dimension "X."

DISTANCE FIXTURE BOLTS LOCATED IN FRONT OF WALL

To locate fixture bolts:

T = thickness of wall flange of closet

X = distance closet is to be located from finished wall

B = distance fixture studs should extend in front of finished wall.

$$\text{Thus, } T + X + 5/8" = B$$

"Minimum 'P' Dimension" is the minimum dimension from front of faceplate to finished wall:

Z1201/Z1202/Z1203/Z1204	Z1208 thru Z1209
1-3/4"	1"

"Standard 'P' Dimension" which is regularly supplied unless otherwise specified, provides for the following dimensions from the front of the faceplate to finished wall:

Z1201/Z1202/Z1203/Z1204		Z1208 thru Z1209	
MIN.	MAX.	MIN.	MAX.
5"	6"	4"	5-1/8"

Longer 'P' dimensions (or shorter) with couplings up to, and including 12", are furnished at no extra charge. An additional charge will be made for greater 'P' dimensions (see Suffix -CL).

ALLOWANCE FOR CONCEALED FLUSH VALVES

When wall closets are installed with concealed flush valves having rear inlet supply, location of faceplate is important – for Siphon Jet bowls, it is not necessary to locate faceplate behind supply line, since supply line will clear top of faceplate and vent line. For Blow Out installations, however, faceplate must be located behind supply line to prevent interference of faceplate with supply line.

Dimensions below based on B = 3/8".

Z1201/Z1202/Z1203/Z1204

Z1201-FMBO EZCARRY® ADJUSTABLE HORIZONTAL HIGH PERFORMANCE SIPHON JET WATER CLOSET CARRIER SYSTEM WITH FLOOR MOUNT BACK OUTLET FIXTURE SUPPORT

ENGINEERING SPECIFICATION

EZCarry® horizontal siphon jet water closet carrier system with high performance waterway and () hub and spigot or no-hub connections. Floor mount back outlet connection optimized for installation. System includes Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep and extended 2" [51 mm] vent, adjustable gasketed faceplate, floor mounted, back outlet fixture support, trim, bonded "Neo-Seal" gasket, and EZ-Set™ Coupling designed to increase flow velocity and line carry.

NOTE

Feet anchored to floor using minimum 1/2" [13] diameter anchors.

⌚ Z1201-N EZCARRY® ADJUSTABLE HORIZONTAL HIGH PERFORMANCE SIPHON JET NO-HUB WATER CLOSET CARRIER SYSTEM

ENGINEERING SPECIFICATION

Zurn Z1201-N() EZCarry® horizontal siphon jet water closet carrier system features high performance waterway and () no-hub connections. System includes Dura-Coated cast iron right-hand, left-hand, or double main fitting with hydro-mechanically optimized sweep and extended 2" vent, adjustable gasketed faceplate, floor mounted pre-fab slotted foot supports with top anchoring pre-fab support base, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, stud protectors, bonded Neo-Seal gasket, and corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap designed to increase flow velocity and line carry. EZCarry system complies with the requirements of ASME A112.6.1M, up to a 500 lb static load rate.

NOTES

1. Cut 4" adjustable coupling minimum "P" dimension obtainable = 2". EZ-Set" coupling, minimum "P" dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
2. Feet bolted to floor using minimum 1/2 diameter anchors and back slots on carrier feet.
3. Rear anchor foot required for secure installation.

Z1201-N_4-XB BARIATRIC CARRIER - 1000 LBS [454 KG] – EZCARRY® ADJUSTABLE HORIZONTAL HIGH PERFORMANCE SIPHON JET NO-HUB WATER CLOSET CARRIER SYSTEM

ENGINEERING SPECIFICATION

Zurn Z1201-N(-)XB EZCarry® bariatric horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable cast iron coupling is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, rigid support frame assembly, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XB system complies with all applicable requirements of ASME A112.6.1M up to a 1000 lb maximum static load.

NOTES

1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 3".
2. Feet bolted to floor using minimum 1/2" diameter anchors.
3. Rear anchor assembly required for secure installation.
4. Floor anchors must each be able to withstand a pull-out force of 748 lb.
5. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

Z1201-N_4-XH EXTRA-HEAVY-DUTY - 750 LBS [340 KG] – EZCARRY® ADJUSTABLE HORIZONTAL HIGH PERFORMANCE SIPHON JET NO-HUB WATER CLOSET CARRIER SYSTEM

ENGINEERING SPECIFICATION

Zurn Z1201-N(-)-XH EZCarry® extra heavy-duty horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XH system complies with all applicable requirements of ASME A112.6.1M up to a 750 lb maximum static load.

NOTES

1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". Cut ZQ coupling minimum 'P' dimension obtainable = 5".
2. Feet bolted to floor using minimum 1/2" diameter anchors.
3. Rear anchor assembly required for secure installation.
4. Floor anchors must each be able to withstand a pull-out force of 820 lb.
5. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

ZE1201-N_4 ELONGATED BARREL FITTING 38" [965 MM] – EZCARRY® ADJUSTABLE HORIZONTAL HIGH PERFORMANCE SIPHON JET NO-HUB WATER CLOSET CARRIER SYSTEM

ENGINEERING SPECIFICATION

Zurn ZE1201-N() EZCarry® horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, 38" barrel for stall-to-stall direct connection, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports with top anchoring pre-fab support base, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® narrow wall system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

NOTES

1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
2. Feet bolted to floor using minimum 1/2" diameter anchors.
3. Rear anchor foot required for secure installation.

ZF1201-U ONE-PIECE FOOT/FACEPLATE – EZCARRY® HORIZONTAL HIGH PERFORMANCE SIPHON JET NO-HUB WATER CLOSET CARRIER SYSTEM

ENGINEERING SPECIFICATION

ZF1201-U EZCarry® one-piece combination floor mounted foot/faceplate horizontal siphon jet system supplied for () rough-in height features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 3" [76mm] or 4" [102mm] no-hub connections, and extended 2" [51mm] vent. Faceplate enables prefabrication with strut channel or angle iron. Corrosion resistant adjustable 3" [76mm] diameter x 6" [152mm] coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance while reducing installation steps. Complete system includes one-piece combination foot/faceplate, heavy-duty 1/2" [13mm] rear anchor tie own (optional dependent on installation method, see installation instructions), fixture bolts, trim and stud protectors. EZCarry® one-piece combination floor mounted foot/faceplate system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

NOTES

1. Cut 6 [152] adjustable coupling minimum "P" dimension obtainable = 2 [51]. EZSet™ coupling, minimum 'P' dimension obtainable = 4-1/4 [108] or 1-1/16 [27] for 12 [305] NPT.
2. For floor mounting, faceplate bolted to floor using 1/2 [13] diameter anchors.
3. For unistrut attachment, 3/8 [10] bolts recommended.
4. Rear anchor requirement is dependent on installation type. See installation instructions.

Ⓢ **ZN1201-N** EZCARRY® ADJUSTABLE HORIZONTAL SIPHON JET – NO-HUB NARROW WALL SYSTEM (9-3/8" DEPTH FRONT TO BACK)

ENGINEERING SPECIFICATION

Zurn ZN1201-N()4 EZCarry® narrow wall horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimize flow performance while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, fixture bolts, trim, and stud protectors. EZCarry® narrow wall system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

NOTES

1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 1-1/4".
2. Carrier floor anchors must each be able to withstand a pull-out force of 1741 lb.
3. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

🕒 Z1202-N EZCARRY® ADJUSTABLE VERTICAL HIGH PERFORMANCE SIPHON JET – NO-HUB SERIES

ENGINEERING SPECIFICATION

Zurn Z1202-()N EZCARRY® vertical siphon jet water closet carrier system features high performance waterway and 4" no-hub connections. System includes Dura-Coated cast iron right-hand, left-hand, or double main fitting with hydro-mechanically optimized sweep and extended 2" vent, adjustable gasketed faceplate, floor mounted pre-fab slotted foot supports with top anchoring pre-fab support base, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, stud protectors, bonded Neo-Seal gasket, and corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap designed to increase flow velocity and line carry. EZCARRY system complies with the requirements of ASME A112.6.1M, up to a 500 lb static load rating.

NOTES

1. Cut 4" adjustable coupling minimum "P" dimension obtainable = 2". EZ-Set™ coupling, minimum "P" dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
2. Feet bolted to floor using minimum 1/2" diameter anchors and back slots on carrier feet.
3. Rear anchor foot required for secure installation.
4. 2" no-hub vent connection regularly furnished on right-hand side. Left-hand available when specified (Suffix -VL).
5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

Items designated as Best Sellers are most specified and are generally in stock for shipment.

🕒 Z1202-H EZCARRY® ADJUSTABLE VERTICAL HIGH PERFORMANCE SIPHON JET – HUB AND SPIGOT SERIES

ENGINEERING SPECIFICATION

Zurn Z1202-()H EZCARRY® vertical siphon jet water closet carrier system features a high performance waterway and 4" hub and spigot connections. System includes Dura-Coated cast iron right-hand, left-hand, or double main fitting with hydro-mechanically optimized sweep and extended 2" vent, adjustable gasketed faceplate, floor mounted pre-fab slotted foot supports with top anchoring pre-fab support base, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, stud protectors, bonded Neo-Seal gasket, and corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap designed to increase flow velocity and line carry. EZCARRY system complies with the requirements of ASME A112.6.1M, up to a 500 lb static load rating.

NOTES

1. Cut 4" adjustable coupling minimum "P" dimension obtainable = 2". EZ-Set™ coupling, minimum "P" dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
2. Feet bolted to floor using minimum 1/2" diameter anchors and back slots on carrier feet.
3. Rear anchor foot required for secure installation.
4. 2" hub and spigot vent connection regularly furnished on right-hand side. Left-hand available when specified (Suffix -VL).
5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

Items designated as Best Sellers are most specified and are generally in stock for shipment.

Z1202-N-XB EZCARRY® BARIATRIC CARRIER – 1000 LB ADJUSTABLE VERTICAL SIPHON JET – NO-HUB SERIES

ENGINEERING SPECIFICATION

Zurn Z1202-N(-)XB EZCARRY® bariatric vertical siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable cast iron coupling is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, rigid support frame assembly, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCARRY® XB system complies with all applicable requirements of ASME A112.6.1M up to a 1000 lb maximum static load.

NOTES

1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 3".
2. Feet bolted to floor using minimum 1/2" diameter anchors.
3. Rear anchor foot required for secure installation.
4. Floor anchors must each be able to withstand a pull-out force of 748 lb.
5. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.
6. 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix -VL).
7. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

Z1202-N-XH EZCARRY® EXTRA HEAVY-DUTY 750 LB ADJUSTABLE VERTICAL SIPHON JET – NO-HUB SERIES

ENGINEERING SPECIFICATION

Zurn Z1202-N(-)XH EZCarry® extra heavy-duty vertical siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XH system complies with all applicable requirements of ASME A112.6.1M up to a 750 lb maximum static load.

NOTES

- Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- Feet bolted to floor using minimum 1/2" diameter anchors.
- Rear anchor assembly required for secure installation.
- Floor anchors must each be able to withstand a pull-out force of 820 lb.
- Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.
- 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix -VL).
- Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

ZF1202-U EZCARRY® ONE-PIECE FOOT/FACEPLATE VERTICAL SIPHON JET NO-HUB WATER CLOSET CARRIER SYSTEM

ENGINEERING SPECIFICATION

ZF1201-U EZCarry® one-piece combination floor mounted foot/faceplate Vertical siphon jet system supplied for () rough-in height features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" [102mm] no-hub connections, and extended 2" [51mm] vent. Faceplate enables prefabrication with strut channel or angle iron. Corrosion resistant adjustable 3" [76mm] diameter x 6" [152mm] coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance while reducing installation steps. Complete system includes one-piece combination foot/faceplate, heavy-duty 1/2" [13mm] rear anchor tie own (optional dependent on installation method, see intallation instructions), fixture bolts, trim and stud protectors. EZCarry® one-piece combination floor mounted foot/faceplate system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb [227 kg] maximum static load.

NOTES

1. Cut ZZ Coupling, Min. 'P' Dim. Obtainable = 2 [51]. Cut EZ-Set™ Coupling, Min. 'P' Dim. Obtainable = 2-1/16 [52] for 12 [305] NPT.
2. Feet bolted to floor using min. 1/2 [13] dia. anchors.
3. Rear anchor requirement is dependent on installation type. See installation instructions.
4. 2 [51] No-Hub vent connection regularly furnished on right hand side. Left hand available when specified (Suffix -VL)
5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

ZF1202-N EZCARRY® VERTICAL SIPHON JET ONE-PIECE CARRIER – NO-HUB SERIES

ENGINEERING SPECIFICATION

Zurn ZF1202-N() EZCarry® one-piece combination floor mounted foot/faceplate horizontal siphon jet water closet carrier system, supplied for () rough-in height, features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes one-piece combination foot/faceplate, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® one-piece combination floor mounted foot/faceplate system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

NOTES

1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
2. Feet bolted to floor using minimum 1/2" diameter anchors.
3. Rear anchor assembly required for secure installation (not on ND4).
4. 2" no-hub vent connection regularly furnished on right-hand side. Left-hand available when specified (Suffix -VL).
5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ).

⌚ ZN1202-N EZCARRY® ADJUSTABLE VERTICAL SIPHON JET – NO-HUB NARROW WALL SYSTEM

ENGINEERING SPECIFICATION

Zurn ZN1202-N()4 EZCarry® narrow wall vertical siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, fixture bolts, trim, and stud protectors. EZCarry® narrow wall system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

NOTES

1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 1-1/4".
2. Carrier floor anchors must each be able to withstand a pull-out force of 1741 lb.
3. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.
4. 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix -VL).
5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

Z1203-N ADJUSTABLE HORIZONTAL SIPHON JET – NO-HUB SERIES

ENGINEERING SPECIFICATION

Zurn Z1203-N() adjustable, horizontal siphon jet water closet provides a rigid system with () size no-hub connections. Comes complete with Dura-Coated cast iron right-hand, left-hand, or double main fitting, 2" vent adjustable gasketed faceplate, universal floor mounted foot supports, corrosion resistant adjustable polymer icoupling with integral test cap, fixture bolts, trim, and stud protectors. Includes rear anchor tie down and bonded Neo-Seal gasket.

NOTES

1. Minimum "P" dimension attainable = 2".
2. Feet anchored to floor using minimum 1/2" diameter bolts through rear slots on carrier feet.
3. Rear anchor foot required for secure installation.
4. When used with Z1204 vertical fitting, and the centerline of the fitting to the finished wall exceeds 11-3/4", a 7" or longer, coupling is needed.

*Regularly furnished unless otherwise specified.

Z1207-N ADJUSTABLE HORIZONTAL HIGH ROUGH-IN SIPHON JET – NO-HUB

ENGINEERING SPECIFICATION

Zurn Z1207-N() adjustable, horizontal, high rough-in siphon jet water closet provides a rigid system with 4" size no-hub connections. Comes complete with Dura-Coated cast iron right-hand, left-hand, or double main fitting, with 2" vent, adjustable gasketed faceplate, universal floor mounted foot supports, corrosion resistant adjustable ABS coupling with integral test cap, fixture bolts, trim, and stud protectors. Rear anchor tie down and bonded "Neo-Seal" gasket.

NOTES

1. 13-1/2" minimum space required between front of foot and rear of anchor to install Z1207-N4 Series.
2. Minimum "P" dimension obtainable = 2".
3. Feet anchored to floor using minimum 1/2" diameter anchors through rear slots on carrier feet.
4. Rear anchor foot required for secure installation.

Z1350-EZ NARROW WALL HYDRANT WITH MOUNTING BRACKETS – ENCASED, MODERATE CLIMATE

ENGINEERING SPECIFICATION

Zurn Z1350-EZ encased moderate climate wall hydrant is designed for narrow wall installation. Features bronze body, all bronze interior parts, replaceable seat washer, screwdriver operated stop valve in supply, key operated control valve, and 3/4" IP female inlet and 3/4" male hose connection standard. Includes stainless steel box and hinged cover with cylinder lock and "WATER" stamped on cover. Comes complete with mounting brackets and hardware for installation and horizontal adjustment inside a 16" on center stud wall.

NOTES

The adjustable sleeve on the stainless steel box is provided with a gasket as standard, but additional caulking of all inside joints is required (by others) after the hydrant box has been properly set. Caulking should be performed on all open seams, including the seams where the gasket is present.

Z1360XL GROUND HYDRANT – ENCASED, FLUSH TYPE, NON-FREEZE

ENGINEERING SPECIFICATION

Zurn Z1360-XL encased, lead-free[†], non-freeze ground hydrant is designed for flush with grade or finished (non-traffic) floor installation. Features galvanized steel casing, bronze and stainless steel interior components, bronze seat and replaceable seat washer, non-turning operating rod, and free-floating compression closure valve with 3/4" or 1" inlet connection with 1/4" tapped drainage port on housing, and 3/4" or 1" male hose connection. Includes plain bronze box and locking, hinged, scoriated cover stamped "WATER" and operating key.

NOTES

‡Non-Freeze feature will not automatically function when (-VB suffix) vacuum breaker is specified. The vacuum breaker must be manually tripped to facilitate drainage of hydrant.

	Cleanout Plug	Z1470

🕒 Z1400-BZ1 FLOOR CLEANOUT WITH "TYPE B" COVER AND EZ1™ TECHNOLOGY

ENGINEERING SPECIFICATION

Zurn Z1400-BZ1 cleanout features Dura-Coated cast iron body with bottom outlet, gas and water tight threaded ABS tapered plug, and top assembly. EZ1 drainage series is engineered to simplify product installation. Rough-in adapter provides up to 1-1/4" [32] of vertical post pour adjustment, pre-packaged shims for tilt correction, and integrated, self-contained Type B light duty scoriated cover with rough-in cover for protection during concrete pour. Cleanout is designed in accordance with ASME A112.36.2M.

Z1700 SHOKTROL WATER HAMMER ARRESTORS

ENGINEERING SPECIFICATION

Zurn Z1700 Shoktrol Water Hammer Arrestors are regularly furnished in all stainless steel construction. Pipe threads are accurately machined to assure tight connection. 3/4" [19mm] male I.P.S. inlet is standard for the 100 size units, while 1" [25mm] male I.P.S. inlet is standard for sizes 200 thru 600.

NOTE:

Where required in piping systems, properly sized water hammer arrestors shall be Zurn Z1700 (specify size) with nesting type bellows contained within a casing having sufficient displacement volume to dissipate the calculated kinetic energy generated, in the piping system. Both casing and bellows constructed of Type 304 stainless steel.

All sizes of Zurn Z1700 Shoktrol water hammer arrestors comply with the following specifications:

STAINLESS STEEL DRAINS – BUTT-WELD ENGINEERING DATA

Butt-Welding Casting Outlets

The outlet sections of all cast carbon steel or cast stainless steel products as specified from this brochure shall conform to ANSI-B36.10M-85 and ANSI-B36.19M-85 standards for pipe wall thicknesses for Schedule 10, Schedule 40, or Schedule 80 as specified.

Butt-welding ends of the above mentioned sections shall conform to ANSI B16.25-86 standard for plain welding bevel of $37\frac{1}{2}^{\circ} + 2\frac{1}{2}^{\circ}$ and root face (land) of $\frac{1}{16}'' + \frac{1}{32}''$.

All outlet requirements must be specified and made known to the manufacturer prior to quotation of prices of products applicable to the project.

SANI-FLOR RECEPTORS – MATERIAL SELECTION

A.R.C. Acid Resisting Epoxy Coating is a baked-on powder coating which produces a smooth, hard, high gloss finish. This epoxy based coating offers high impact resistance and excellent life expectancy in all drainage applications.

A.R.E. Acid Resisting Porcelain Enamel is a substantially vitreous inorganic coating bonded to metal by fusion at a high temperature above 800°F. This coating offers excellent acid, abrasion, and wear resistance. The coating is extremely hard and is the ultimate for sanitation in drainage application.

SANI-FLOR RECEPTORS – OPTIONS AND VARIATIONS

Zurn Sani-Flor Receptor options are specified as a PREFIX and/or SUFFIX letter or number added to the series designation. Each floor sink in the catalog is listed with its individual Prefix/Suffix variation.

PREFIXES	
Z	Cast iron body with white acid resisting porcelain enamel (A.R.E.) interior and top.
ZN	Cast iron body with white acid resisting porcelain enamel (A.R.E.) interior and nickel bronze top.
SUFFIXES	
-C	Clamp Collar
-DX	Dex-O-Tex Flange
-HD	Stainless Steel Frame with Extra-Heavy-Duty Stainless Steel Grate - Specify in areas where working load exceeds 2000 pounds or where extreme chemical resistance properties are required.
-HP	Heel-Proof Grate
-K	Anchor Flange
-KC	Anchor Flange with Seepage Holes and Clamp Collar
-LD	Less Internal Bottom Dome Strainer
-LS	Less Secondary Strainer
-P	1/2" Threaded Trap Primer Connection (See Z1023)
-S	Secondary Strainer
-T	Square Nickel Bronze Top
-TC	Neo-Loc Test Cap Gasket 2"-4" NL Bottom Outlet Only
-VPS	Vandal-Proof Strainer
-WB	Water Supply Control Box
-1	Less Grate - Receives multiple indirect wastes from either condensate lines, air conditioners or other indirect drainage equipment specifically located in non-traffic areas.
-2	Half Grate - Receives indirect waste as with Suffix -1, but with 1/2 grate opening to easily accept waste from a single direction while providing a finished floor drain top on the opposite side.
-3	Three-Quarter Grate - Receives indirect waste as with Suffix -1, but with 3/4 grate and 1/4 opening to easily accept waste from a single source.
-4	Full Grate with Center Opening - Receives indirect waste as with Suffix -1, but with square center opening to accept waste from multiple directions.
-5	Grate with 4" Diameter x 3-3/4" High Funnel
-6	Grate with 6" Diameter x 6" High Funnel - Receives indirect waste from single pipe using round funnel which is centrally located on grate. Prevents splashing of waste around entire receptor. Can be relocated at job site to meet project requirements.
-7	Grate with 6-3/4" x 3" x 1" High Oval Funnel
-8	Grate with 8-7/8" x 3-5/8" x 3-3/4" High Oval Funnel - Receives indirect waste from a series of pipe discharges using oval funnel which is centrally located on grate. Can be relocated at job site to meet project requirements.
-9	Angle Frame and Grate - Used in food handling facilities incorporating a two-fold purpose. An angle drain provides a sanitary floor drain in an open service area where open half of grate is hidden inside cabinetry to receive an indirect waste discharge. Two-piece construction further enhances the ultimate in sanitation standards.
-11	Vandal-Proof Secured Grate - Prevents removal of grate by unauthorized individuals.
-12	Depressed Aluminum Grate - Specified for areas in restaurants, food markets, taverns, and many non-traffic areas. Grate recess accumulates food particles rather than let them fall into receptor.
-15	Solid Loose Set Cover - Specified when receptor is to be inactive a majority of the time.
-16	Half Solid Loose Set Cover - Same as Suffix -15, but with 1/2 cover open to accept indirect waste.

SUFFIXES	
-17	Three-Quarter Solid Loose Set Cover - Same as Suffix -16, but with 3/4 cover inactive.
-18	Solid Loose Set Cover with Square Center Opening - Same as Suffix -16, but with center opening and balance of cover inactive.
-19	Full Hinged Grate - Specified in light traffic areas where grate removal is prohibited for any length of time.
-23	Aluminum Sediment Bucket - Specified when interception and retention of solids is necessary. Used in food preparation areas.
-25	White Acid Resisting Sediment Bucket - Same as Suffix -23, but with acid resisting finish.
-31	Stainless Mesh Liner for Sediment Bucket - Specified when retention of fine particles is required. Provided with screen having 331 holes per square inch.
-32	Aluminum Dome Strainer
-33	White Acid Resisting Anti-Splash Dome Strainer - Use in areas where harsh chemicals or substances enter receptor.
-34	Nickel Bronze Anti-Splash Dome Strainer

-1 Less Grate

-2 Half Grate

-3 Three-Quarter Grate

-4 Full Grate with Center Opening

-5, -6 Grate with Round Funnel

-7, -8 Grate with Oval Funnel

-9 Angle Frame and Grate

🕒 Z1903 SANI-FLOOR RECEPTOR INSTALLATION STABILIZER

ENGINEERING SPECIFICATION

Zurn Z1903 Sani-Floor receptor installation stabilizer features a 16-gage, galvanized steel plate with variable pipe opening, four support stud holes, and four nail holes. Comes complete with hardware bag containing four 3/8"-16 x 12" long studs, eight 3/8"-16 flange locknuts and coverplate with hole for standard 2" pipe size and perforated knockouts for 3" and 4" pipe connections. (For use with Z1900, Z1901, and Z1902 Sani-Floor receptors.)

NOTE

Stabilizer plate may be used without coverplate for narrow floor applications where the drain body will be recessed into stabilizer plate.

Z1982 12" X 12" STAINLESS STEEL SANI-FLOR CAN WASH DRAIN WITH 8" SUMP DEPTH

ENGINEERING SPECIFICATION

Zurn Z1982 Sani-Flor can wash drain features 12" x 12" x 8" deep fabricated stainless steel body, bottom outlet, anchor pan, medium-duty, loose set grate, and standing sediment bucket. Comes complete with chrome-plated bronze spray nozzle and water supply assembly.

Z1995 24" X 16" A.R.C. SANI-FLOR RECEPTOR WITH 17" SUMP DEPTH

ENGINEERING SPECIFICATION

Zurn Z1995 Sani-Flor receptor features 24" x 16" x 17" deep, white acid resisting epoxy coated interior, fabricated steel body, integral anchor flange, and rectangular square holed, heavy-duty grate - complete with aluminum anti-splash interior bottom dome strainer.

NOTE

†Add 3/8" to 15-3/4" x 23-3/4" and 3/16" to 'E' dimensions when specifying ZN1995.

ALPHANUMERIC INDEX	332
GENERAL TERMS AND CONDITIONS	336

TECHNICAL INFO - ZURN OUTLET PIPE CONNECTIONS

INSIDE CAULK (IC)

Often specified where drain body is positioned on pipe, bottom of outlet is sealed with oakum and connection is then completed according to local plumbing codes.

INSIDE GASKET (IG)

The IG connections utilize an inside caulk drain body and a Zurn "Sealtrol" gasket. This connection is only recommended for basement or ground floor applications.

I.C. with Sealtrol Gasket (IG) Inside Caulk (IC)

OUTLETS	'A'	'B'	'C'
2. [51] I.C. Outlet	2-5/8 [67]	3-1/16 [78]	-
3. [76] I.C. Outlet	3-3/4 [95]	4-3/16 [106]	-
4. [102] I.C. Outlet	4-3/4 [121]	5-3/16 [132]	-
5. [127] I.C. Outlet	5-3/4 [146]	6-3/16 [157]	-
6. [152] I.C. Outlet	6-3/4 [172]	7-3/16 [183]	-
8. [203] I.C. Outlet	8-7/8 [226]	9-1/2 [241]	-

IRON PIPE (IP)

Zurn Iron Pipe Threaded connection is an old industry standard. The female (NPT) threaded outlet is often specified on industrial and institutional applications.

I.P. (Threaded/N.P.T.)

OUTLETS	'A'	'B'	'C'
2. [51] N.P.T. Outlet	2 [51]	9/16 [14]	3-1/4 [83]
3. [76] N.P.T. Outlet	3 [76]	3/4 [19]	4-1/2 [114]
4. [102] N.P.T. Outlet	4 [102]	15/16 [24]	5-5/8 [143]

NEO-LOC (NL)

Zurn Neo-Loc is a unique labor-saving compression gasketed connection designed to simply push on the stub end of the pipe. The Neo-Loc drain body and gasket can be utilized with plastic, steel, No-Hub and service weight soil pipe. A unique pipe stop cast in each Zurn Neo-Loc drain body ensures a proper fit.

Note: Not recommended for roof drain applications due to the watertight integrity of the Neo-Loc connection to the leader pipe being dependent upon adequate leader pipe support and accurate perpendicularity of leader pipe into Neo-Loc gasket.

"Neo-Loc" (NL)

OUTLETS	'A'	'B'	'C'
2. [51] Neo-Loc Outlet	2 [51]	3-3/8 [86]	3 [76]
3. [76] Neo-Loc Outlet	3 [76]	4-3/8 [111]	4 [102]
4. [102] Neo-Loc Outlet	4 [102]	5-1/2 [140]	5-1/8 [130]
2. [51] NL w/-TC	2 [51]	3-3/8 [86]	3 [76]
3. [76] NL w/-TC	3 [76]	4-3/8 [111]	4 [102]
4. [102] NL w/-TC	4 [102]	5-1/2 [140]	5-1/8 [130]

Special Note: Zurn "Neo-Loc" and "Sealtrol" gaskets are designed for use exclusively with Zurn drainage products. They are not sold separately and all warranties either expressed or implied would be forfeited if used in other than a Zurn drainage product.

TECHNICAL INFO - TOP LOADING CLASSIFICATION

Selection of a Zurn Floor Drain should be based on the load factor and the anticipated traffic. Many of Zurn's cast iron grates may be furnished in Duresist iron when increased working load requirements are necessary. Specify Duresist grate (-DG) when required or contact your Zurn representative when special applications are necessary.

Zurn drains are rated as follows: (Reference ASME Standard A112.6.3M)

6.1 – LOADING CLASSIFICATIONS

Grates and top rims shall be designed to meet the following loading classifications.

6.1.1 – LIGHT DUTY

All grates having safe live load (as calculated in para. 6.2.5) under 2000 lb. [900 kg].

6.1.2 – MEDIUM DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 2000 lb. [900 kg] and 4999 lb. [2250 kg].

6.1.3 – HEAVY DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 5000 lb. [2250 kg] and 7499 lb. [3375 kg].

6.1.4 – EXTRA HEAVY DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 7500 lb. [3375 kg] and 10,000 lb. [4500 kg].

6.1.5 – SPECIAL DUTY

Grates having safe live load (as calculated in para. 6.2.5) over 10,000 lb. [4500 kg] shall be considered special and treated accordingly.

6.2 – TEST PROCEDURE FOR GRATE LOADING

Live Load – Requirements listed in 6.1 through 6.1.5 shall be determined as follows:

*Safe live load rating of grates is for general classification purposes only.
For the actual safe live load of any given grate, contact your Zurn representative.

Note: ZB and ZN 400 Series drain head assemblies are rated for light-duty applications only.

6.2.1 – LOAD CLASSIFICATIONS

Load classifications as stated in 6.1 shall be determined by laboratory tests.

6.2.2 – PLATEN SIZE

A 3.5 in. [89 mm] diameter platen shall be applied to the center of the grate specimen.

6.2.3 – LOADING

Loading shall be applied slowly so that point of failure can be observed.

6.2.4 – POINT OF FAILURE

(a) Brittle Materials (Cast Iron). The load (in pounds or kilograms) at which the first fracture on any part of the specimen appears.

(b) Ductile Material. The load which the permanent set (at the point of loading) is greater than 2% of the longest transverse dimension of the specimen.

6.2.5 – GRATE CLASSIFICATION

The maximum safe live load is computed by dividing the load at failure by two.

TECH INFO

ZURN CAST IRON

Conforms to ASTM Specification for Gray Iron Castings A48, Class 25. It is produced utilizing the latest equipment and newest developed foundry techniques. Zurn cast iron castings are characterized by a high degree of strength, corrosion-resistance, workmanship, and finish.

ZURN DURESIST

A ductile iron complying with ASTM Specification A536, Grade 60-45-10. Its physical properties make it ideal for grates and drain components that are subjected to severe and heavy duty service. Its chemical characteristics make possible a degree of corrosion-resistance far superior to that of cast iron. Zurn Duresist exhibits remarkable stress qualities, possessing a yield strength in the same range as that of cast carbon steel, while its ability to absorb the shock loading of traffic areas is unequalled, making its use ideal for all areas where extra heavy duty service is a requirement – whether indoors or outdoors – in chemical and metal processing plants or other industrial applications.

ZURN DURA-COAT

A specially formulated paint designed to resist cracking and chipping. Dura-Coat is a latex-based coating developed to be used with cast iron substrate. Dura-Coat is designed, per ASME standards, to protect the product "during normal handling and warehousing prior to installation".

ZURN GALVANIZED CAST IRON

A process of applying heavy zinc coating to a thoroughly cleaned iron casting. This coating contains 95% zinc. Zurn galvanizing can be supplied on all cast iron parts. It increases longevity and is recommended wherever the discoloration caused by oxidation of cast iron is objectionable. Galvanize should be used in industrial areas where corrosive atmosphere may be encountered.

CADMIUM PLATED CAST IRON

A process of applying a heavy cadmium coating to a thoroughly cleaned iron casting. This coating contains 95% cadmium in a cold applied process. Cadmium plating can be supplied on all cast iron parts. It increases longevity and is recommended wherever the discoloration caused by oxidation of cast iron is objectionable.

PROPERTIES OF BASIC DUCTILE VERSUS CAST IRON

METAL	CAST IRON	DUCTILE IRON
Specification	Class 25	60-45-10
Tensile Strength (PSI)	25/30,000	60/80,000
Yield Strength (PSI)	NIL	45/60,000
Elongation	NIL	10% to 25%
Modules of Elasticity	16 x 10	24 x 10

ZURN BRONZE

A semi-red brass conforming to ASTM Specification for Copper Alloy Sand Casting B584, Copper Alloy No. 844. The exposed surface is normally supplied possessing a satin sheen texture which allows it to blend unobtrusively with surrounding finishes. When the application requires, Zurn Bronze can be polished to a high gloss.

ZURN NICKEL BRONZE

A unique material that is ideally suited to traffic-bearing grates and strainers in finished floor areas. It affords the combined advantage of greater strength, better appearance, and longer service life at the same price as chrome plated brass. Superior ductility and shock resistance are the result of a copper nickel alloy (Copper Alloy 997) having a wearing surface similar in appearance to satin chrome plate; however, because it does not have a plated surface it cannot chip, peel, crack, or wear off. It is highly resistant to corrosion; however, the process of oxidation will naturally occur over time with most metals. Methods have been developed to prevent, preserve, and restore metals affected by oxidation.

CHROME PLATED BRONZE

Ideal for installation in walls, gutters, and other areas where a bright decorative finish is desired, and is not subject to the abrasive action of foot and other traffic. It is not recommended for installations where the abrasion will eventually wear through and cause peeling. It should always be specified for swimming pool fittings due to its high resistance to the halogens (chlorine, etc.), encountered in swimming pool sanitation.

ALUMINUM

Casting grade 319. This is an alloy containing both silicon and copper. It is a solid cast metal in a pleasing light gray color. The light weight, coupled with its exceptional strength and corrosion resistance, makes it ideal for drain components such as sediment buckets and strainers. When used with acid-resisting porcelain enamel coated drains, the possibility of chipping is minimized.

ZURN STAINLESS STEEL

Castings are normally produced in Type CF8 (304) which is an 18-8 Austenitic Stainless possessing excellent corrosion resistant qualities. For some applications where conditions demand, Type CF8M (316) stainless steel can be supplied. Items formed from stainless steel sheet and other stainless steel products are regularly furnished in Type 304 with 316 as an optional material.

A.R.C.

Acid Resisting Epoxy Coating is a baked-on powder coating, which produces a smooth, hard, high gloss finish. This epoxy based coating offers high impact resistance and excellent life expectancy in all drainage applications.

A.R.E.

Acid Resisting Porcelain Enamel is a substantially vitreous or glassy inorganic coating bonded to metal by fusion at a high temperature above 800°F. This coating offers excellent acid, abrasion, and wear resistance. The coating is extremely hard and is the ultimate for sanitation in drainage applications. Zurn A.R.E. coating conforms to the requirements of F.D.A. (Food and Drug Administration) Regulation 21-CFR5 117.1360.

GENERAL TERMS AND CONDITIONS

PRICE AND TERMS OF PAYMENT

Terms are net, payable 30 days from date of invoice. Zurn Credit must be identified of potential pricing errors within 30 days of invoice date. Shortage claims must be reported within 10 working days of receiving product to your local Zurn Rep or Zurn Customer Care. The Buyer shall pay all sales, consumers, or other applicable taxes. A 1-1/2% monthly (18% annual) service charge will be added to the outstanding balance of all past due invoices.

Minimum invoice \$250.00. Zurn Water, LLC ("Zurn") reserves the right to apply a minimum order charge in order to meet the \$250.00 minimum invoice requirement. All orders are subject to credit approval by the Zurn Credit Department prior to the acceptance of an order. Orders may be refused, delivery may be withheld, or shipment stopped in transit without any liability on Zurn's part at Zurn's sole discretion based upon Buyer's credit worthiness as determined by Zurn.

FREIGHT

All sales are F.O.B. seller's location. Zurn will allow full freight allowance when any of the following conditions are met: 1) Plumbing Fixtures only orders totaling \$10,000 or more; 2) Zurn One Systems orders of \$7,500 or more; 3) Any combination of Linear Drainage and/or Stainless Drains orders of \$5,000 or more; 4) Any combination of Specification Drainage, Finish Plumbing, and/or Zurn Wilkins of \$5,000 or more; 5) Commercial Drainage only orders of \$3,500 or more; 6) PEX orders of \$3,000 or more. This full freight allowance applies when the shipment is within the continental United States and has a single destination of a Buyer's standard address or job location. Routing of shipment shall be determined at the sole discretion of Zurn. Shipping dates are estimates and time of delivery shall not be of the essence of this sale contract. Under no circumstances will the Seller have any responsibility on account of any delays in manufacture, transportation, or otherwise. Terms of Export Shipment on application.

NOTE: Shipments in excess of 90" long or 3,000 lbs may be subject to additional charges, and shall be defined as an oversized and/or overweight product and Zurn's standard FFA terms may not apply. Please contact our Customer Service Department for guidance on potential additional shipping charges. This new policy supersedes any existing agreements.

These charges and restrictions apply in addition to Zurn standard terms and conditions for sale unless otherwise agreed upon by the parties.

LIMITED WARRANTY

Zurn goods sold hereunder are warranted to be free from defects in material and factory workmanship for the period of time from the date of purchase: AquaVantage® Flush Valves, AquaFlush® Flush Valves, Commercial Fixtures, Faucets, Showers, and Tubular Brass: three years; Chemical Drainage, Linear Drainage, Commercial Drainage, Specification Drainage, Zurn Wilkins, and Flush Valve, Faucets, and Tubular Brass decorative finishes: one year; PHIX® Cartridge: ten years; FOG-ceptor®: thirty years. Where permitted by law, **THE IMPLIED WARRANTY OF MERCHANTABILITY IS LIMITED TO THE ABOVE IDENTIFIED PERIOD OF TIME AND SHALL BE LIMITED SOLELY TO THE REPLACEMENT OF THE DEFECTIVE GOODS.** A damaged/broken test cock or ball valve is not considered defective. Please contact Zurn Customer Care for assistance.

Zurn will replace goods at no cost that prove defective provided Zurn is notified in writing of such defect and the goods are returned prepaid at the specified Zurn location with evidence that they have been properly maintained and used in accordance with instructions. **ZURN SHALL NOT BE RESPONSIBLE FOR ANY LABOR CHARGES OR ANY LOSS, INJURY, OR DAMAGES WHATSOEVER, INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES.** The sole and exclusive remedy shall be limited to the replacement of the defective goods. Before installation and use, the purchaser shall determine the suitability of the product for his intended use and the purchaser assumes all risk and liability whatever in the connection therewith. All weights stated in Zurn catalogs and lists are approximate and are not guaranteed.

RETURNED GOODS

Standard cataloged material may be returned only with the written permission of Zurn. Returned goods are subject to a 25% restocking charge of total saleable material returned, plus the cost of reconditioning, if necessary, to make material sellable. Transportation charges are the responsibility of the Buyer. Credit allowance will be in the form of merchandise credit only – not cash credit. The value of the return must total at least \$100.00 to qualify for credit allowance. No credit will be allowed for parts unless originally ordered and invoiced as parts. No credit will be allowed for discontinued or made-to-order items. Items that have been specially made are not subject to return or cancellation except by special negotiation. Material must be returned within one year of invoice date for credit to be issued for Commercial Fixtures, Flush Valve Products, Specification Drainage, Tubular Brass, Zurn Wilkins, Chemical Drainage, Linear Drainage, and Commercial Drainage. No credit is allowed for Linear Drainage products that have been cut and Specification Drainage product with auxiliary tapings. Flush Valve material over one year old will be subject to a 50% handling charge. Flush Valve material over five years old will not be accepted. Commercial Drainage and Specification Drainage galvanized material will be credited at value of Dura-Coated cast iron, and chrome-plated at value of bronze. Zurn Wilkins damaged/broken test cocks or ball valves are not considered defective.

ILLUSTRATIONS OF TYPICAL INSTALLATIONS

The typical installations for various products found in each product section are intended to illustrate the products and potential options for the use of these products. Under no circumstances are they to be construed as recommended installation procedures. Consult local codes and project specifications for proper installation instructions.

SHORTAGE/DAMAGE CLAIMS

Notification of material shortages or incorrect filling of orders must be made to Zurn within 10 days of receipt. No claims over three months old will be honored. Buyer agrees to make all complaints for damage in transit or "short count" directly to the carrier; before the contents are unloaded have the carrier agent's acknowledgment of such damage noted on the bill of lading and to present to the carrier its agent's acknowledgment of such damaged material with formal claim covering said damage.

GENERAL

Zurn reserves the right to make changes in design or equipment of any item or product without incurring any obligation on previously sold items, and to discontinue items at any time, without notice. Possession of this Catalog or other sales literature is not to be construed as an offer to sell. All orders are subject to acceptance by Zurn. Catalog printed in U.S.A.

Zurn flush valves are designed to comply with Army Corp of Engineers and Naval guide specifications, Military Specification MIL.V.29193 and Federal Specification WWP541.

Zurn flush valves comply with the following standards: ASME A112.18.1/CSA B125.1, A112.19.5, A112.19.2, A112.19.6, ASSE 1037 and 101 are listed by the following agencies: Canadian Standards, IAPMO/UPC/CUPC, and CSA 125.3. Zurn flush valves are manufactured from dezincification resistant alloys. For additional compliances, contact Zurn Water, LLC, Finish Plumbing Operation, or 1-800-997-3876.
