

# ZF199 Downspout Nozzle

Makes the Cut...and Customers Happy

You don't need to get the final connection just right. You just need the right downspout nozzle. The ZF199 Downspout Nozzle makes installation intuitive with its gasket connection and clamp feature. That means you can leave the last connection long and cut once the downspout nozzle is ready to be set in place, instead of fussing upfront.

The ZF199 is compatible with both cast iron and PVC piping. It offers a low profile – only 2-1/2 inches off of the wall, including the spout. The flapper comes standard, so there's no additional specification on your end. The all-aluminum cast piece ensures durability down the road.

It's not just an easy choice for you. Customers will appreciate the color selection – five universal options from bone white to black to the gradients in between. The hidden clamp bolts offer a completely seamless facade.

## Intuitive Installation

- Gasket connection and clamp feature
- Compatible with cast iron and PVC piping
- Simple watertight attachment

## Durable Construction

- All-aluminum cast
- Powdercoat finish
- Flapper comes standard

## Complementary Aesthetics
