

FACT SHEET

Zurn® Top Mount Exposed Sensor Flush Valves With Ceramic Gear Operation and AquaVantage® Diaphragm, for Water Closets and Urinals

The Zurn Difference

Long-lasting Performance

Uses EZ Gear technology, a gear-driven ceramic cartridge that is less susceptible to debris and buildup for easy maintenance; outlasts and outperforms solenoids.

On-demand Flushing

True mechanical override button allows for manual flushing when needed.

Hygienic, Auto Activation

Touchless sensor activation minimizes touch points and potential spread of germs.

Minimizes Stagnation

Toggle feature for optional 24-hour line flushing to minimize stagnation and maintain fixture trap seals that protect against sewer gases.

Chemical Resistant

Industry-leading, filtered AquaVantage® diaphragm, gaskets and seals are made of chemical-resistant thermoplastic elastomer, which lasts 8-10 times longer than traditional rubber, reducing maintenance costs.

Durable and Attractive

Heavy-duty brass body with polished chrome finish stands up to extreme wear, while maintaining luster.

Reliable Operation

Choose battery-operated or hardwired with battery backup; both work even when electric goes out.
