

When it Rains, it Performs... and Then Some

Get the One Drain That Works Twice as Hard

Customers trust the Zurn name when it comes to proper building drainage. We've added Froet Drain® products to our advanced drainage offering for their value to contractors and building owners. The bi-functional roof drain takes on the jobs of a primary and secondary roof drain within one superior patented system.

Contractors experience a simplified installation. By design, the system allows for both primary and secondary piping connections. The 45-degree primary outlet and ranging dimensions work with practically any application.

Building owners realize lasting performance. The cast iron body with powder coated finish, and increased clamping ring surface reduce the possibility for leak paths. The combination membrane flashing clamp and gravel guard help protect against corrosion over time.

Froet Bi-Functional Roof Drain

- Long-lasting construction
- Third-party flow tested
- Self-cleaning design
- 6" install height cast iron dome
- 45-degree primary outlet connection
- Available for low-profile and ultra-low-profile domes
