

Architectural Sensor Faucets

Sleek, Sustainable, Reliable Style

Create a more hygienic, sustainable and reliable restroom experience. Stylish sensor faucets have a gear-driven ceramic cartridge with no solenoids to replace, which means less maintenance and fewer repairs. Pairs with an available matching sensor soap dispenser to set your restroom apart.

The high efficiency, low-flow rate and 30-second timeout help save water, and Hydro•X Power® technology option offers renewable hydropower, which saves on batteries and waste. With this winning combination of options, these faucets help meet sustainability goals – and they last the life of a commercial restroom.

Customize usage settings using Zurn Elkay's Bluetooth app. Upgrade to the smart device version for fleet management, including real-time data and usage insides and remote monitoring for your connected plumbing ecosystem.

Reliable, Sustainable Performance

Standard Hydro•X Power® option delivers sustainable performance by providing reliable, uninterrupted hydropower designed to last the life expectancy of a commercial restroom.

Low Maintenance

Uses EZ Gear technology, a solenoid-free, gear-driven ceramic cartridge that is less susceptible to debris and buildup for less maintenance. It outlasts and outperforms solenoids.

High-Efficiency Design

Maximize power without impacting flow volume. High-efficiency design delivers consistent flow volumes from 0.35 to 1.5 gpm and above.

Customizable Features

Prevent overflow and water waste with metering mode and timeout configurations. Bluetooth app allows easy customization of line flushing and sensor range to accommodate your restroom.

Quiet

Quiet water flow and soft-close technology that eliminates water hammer.

Architectural Sensor Faucets

Hydro-X Power

Hydro•X Power® technology option delivers sustainable performance by providing renewable, uninterrupted hydropower designed to last the life expectancy of a commercial restroom.

EZ Gear Technology

Uses EZ Gear technology, a gear-driven ceramic cartridge that is less susceptible to debris and buildup for easy maintenance; outlasts and outperforms solenoids.

Architectural Sensor Faucets

Our architectural series of sensor faucets offer sleek style and fashionable functionality, with adjustable features and vandal-resistant construction that stand up to demanding environments. Low-flow rates meet WaterSense® or CEC compliance to help your water-saving goals.

Pairs Beautifully with Sundara® Handwashing System

Sundara — a Sanskrit term meaning “beautiful” — is a bold approach to the handwashing system. Our unified system of seamless countertops and basins is crafted to pair with faucets and soap dispensers for a modern, elevated restroom experience.
