

TYPICAL INSTALLATION

Z1025

FIXED AIR GAP

Dimensional Data (inches and [mm]) are Subject to Manufacturing Tolerances and Change Without Notice

Z1025

FIXED AIR GAPS

Zurn air gaps provide a vertical break in plumbing systems which are open to the atmosphere. Zurn air gaps are designed to provide positive protection against backflow and conform to open area requirements of ANSI A112.1.2. Consult local codes for specific installation information. It is recommended that air gaps be specified for use in areas where splashing water from the air gap will not be objectionable or cause damage.
