**REEBOK HEADQUARTERS
CANTON, MASSACHUSETTS**

Reebok World Headquarters in Canton, Massachusetts proudly displays 1,300 feet of Zurn Z886-ST 6" wide Perma-Track sport track around the perimeter of their fantastic new building. This custom project was sold by Joseph Feeley of Field Construction Services of Hopkinton, Massachusetts, and the P.J. O'Donnell Company.

Cape & Island Construction of Pocasset was able to easily install the track due to the lightweight 60" modular sections with our quick-connect overlaps and integral rubber clips. Longer sections and fewer joints also help in providing a fast and consistently straight installation. Labor reduction is also provided on the job site due to our pre-sloped and pre-radiused channels. Perma-Track's smooth, non-porous interiors provide superior flow capabilities, as well as substantial cost savings.

Zurn Industries is a leader in innovative structural composite channel drain systems, with office and warehouse facilities in Falconer, New York.

**Sheetz Gas Station
Chesterfield County, Virginia**

**Z886-HH-S
Applications**
Sidewalks
Patios
ADA Ramps
Highways
Parking Lots/Decks

Construction of a new Chesterfield County, VA, Sheetz gas station began in the summer of 2006. Chesterfield County officials require the installation of drainage systems in gas stations for potential fuel spillage. Zurn Flo-Thru provided 120 feet of Z886 six-inch wide Perma-Trench drainage system with a H20 rated ADA top only 1-1/2" wide (HH-S). This style of grate was specified by Sheetz to help reduce potential problems with customers crossing the drain. The six-inch outlet was tied to an Oil Water Separator. The Z886 modules were factory customized with a radius matching the Sheetz canopy. Perma-Trench catch basins installed both upstream and downstream allowed access for inspection and cleaning. The contractor installed the Perma-Trench drainage system in one day

utilizing a suspended-drain method. The first pour locked the drain in place, then covers were set in the channel and the final monolithic pour with the slab was made.

Parking Lots/Decks

- Two runs of 400 feet.
- Located in mall parking lot.
- Sheet flow had to be intercepted and moved through the storm sewer system to BMP structures before it would leave the site.
- Outlet size: 12 inch and 18 inch PVC.
- Z888 was preferred over the specified slotted drain due to:
 - Durability
 - Ductile iron top
 - Meets ADA code
- Installed by site contractor.
