

One-Stage Setpoint Control - QH1SC

Specification Sheet

Tag _____

Dimensional Data: Inches and [mm] are subject to manufacturing tolerances and change without notice.

Engineering Specification: Zurn One-Stage Setpoint Control for heating and cooling. This is a 24VAC microprocessor-based control. This unit will maintain a fixed setpoint by cycling a heating or cooling device. This controller features a wide setpoint range, adjustable differential, and time delay. Unit has an easy to read LCD window. Output is 24VAC, 8 amp relay. Includes one QHUS universal 10K ohm sensor.

Accessories

- ___ **QHMZ1P** Single Zone Pump Control
- ___ **QHSI20C** Slab Sensor with 20' Cable
- ___ **QHSI40C** Slab Sensor with 40" Cable
- ___ **QHUS** Universal Sensor
