

Model 70XL Water Pressure Reducing Valve

Application

Ideal for use where Lead-Free* valves are required. Designed for installation on potable water lines to reduce high inlet pressure to a lower outlet pressure. The unitized replaceable cartridge reduces time involved with cleaning and maintenance. The direct acting integral bypass design prevents buildup of excessive system pressure caused by thermal expansion. The balanced piston design enables the regulator to react in a smooth and Options responsive manner to changes in system flow demand, while at (Suffixes can be combined)

the same time, providing protection from inlet pressure changes.			<u>· · · · · · · · · · · · · · · · · · · </u>						
		in proceeding of an igoof	and 20 mesh strainer screen						
			C - with FC (copper sweat) union connection						
Standards Compliance			DM - double male meter tailpiece connection (3/4);						
ASSE® Listed 1003			1" National Hose Thread fits 5/8" x 3/4" and						
IAPMO® Listed			3/4" water meters (no union included)						
CSA® Certified			DU - with double union FNPT connection						
City of Los Angeles Approved			P - tapped & plugged for gauge						
Meets the requirements of NSF/ANSI/CAN 61 & 372*			G - tapped & plugged with gauge						
*(LESS THAN 0.25% WEIGHTED AVERAGE LEAD CONTENT)			SC - sealed cage bell housing and stainless steel adjusting screw						
			SS - sealed cage bell housing with stainless						
Mataviala			steel adjusting screw and spring						
Materials			CPVC - CPVC tailpiece connection						
Body and bell Seat	Cast bronze, ASTM E Stainless Steel, 300 se		LP - low pressure outlet 10-35 psi available in						
Stem & sleeve	Stainless Steel, 300 s		3/4" single union, & 3/4" double union						
Elastomers	Buna nitrile, FDA (CFF		CM - with male copper sweat union connection						
Elastomers	EPDM, FDA (CFR) 21		DUPF - with Z-Bite [™] push fit tailpiece connection						
Strainer screen	Stainless Steel, 300 s		250 psi max pressure						
			DUPR - with Z-Press™ press fit tailpiece connection						
			250 psi max pressure

Typical Installation

Local codes shall govern installation requirements. Unless otherwise specified, the assembly shall be mounted in accordance with the manufacturer's instructions and the latest edition of the Uniform Plumbing Code. The assembly shall be installed with sufficient side clearance for testing and maintenance. The Model 70XL may be installed in any position. If installed in a pit, vault or indoors, specify the "SC" sealed cage option. Multiple installations are recommended for wide demand variations or where the desired pressure reduction is more than 4 to 1 (i.e.: 200 psi inlet reduced to 50 psi outlet). CAUTION: Anytime a reducing valve is adjusted, a pressure gauge must be used downstream to verify correct pressure setting. Do not bottom adjustment bolt on bell housing.

Specifications

The Pressure Reducing Valve shall be certified to NSF/ANSI/CAN 61, of the direct-acting type, and ASSE® 1003 Listed. The integral bypass check valve main body and bell housing shall be cast bronze (ASTM B 584). The pressure reducing valve shall be of the balanced piston design and shall reduce pressure in both flow and no-flow conditions using an adjusting bolt. All internal parts shall be corrosion resistant and included in a replaceable cartridge. The bronze bell housing shall be threaded to the body and shall not require the use of ferrous screws. The Pressure Reducing Valve shall be a ZURN WILKINS Model 70XL.
