

“A Time Tested Savings From Zurn.”

Zurn presents the new Neo-Loc drain gasket with integral test cap.

In the best interest of the contractor, Zurn again realizes your time is too valuable to have to do things twice. With its patent pending integral test cap gasket design, Zurn allows you, the contractor, to set the drains and at the same time prepare the lines for proper leak testing. There's no need to come back to the same drain some time later to set your test balls for pressure testing.

In addition, the integral test cap eliminates the worry of clogged lines during construction activity. No need to duct tape the drain outlet, thereby saving time on the job.

The Zurn Neo-Loc Integral Test Cap allows you to reduce the number of test balls and test caps required on a project. Once proper line testing is complete, simply cut the gasket along the dotted line and discard the rubber plug. It's fast. It's simple. It just can't get any easier.

To order, specify suffix -TC on your next Zurn Specification Drainage order. Available in 2", 3", and 4" sizes.

Eliminate frustration trying to locate and set test balls.

Save money ... eliminate the need to purchase costly test balls.

Save time ... eliminate the need to unclog debris from drain.

Zurn ... Providing Tomorrow's Plumbing Solutions Today.
